Projector kit with sensor and software

EQ818

Function

It is geared towards the study of horizontal, oblique e perpendicular projections, energy conservation, moment of inertia and its relations with mass distribution, momentum conservation, collision, total momentum in a particle system, elastic collisions, inelastic and perfectly inelastic collisions, ballistic pendulum, etc.

Note: Set may be used conventionally or monitored by computer.
Can be coupled to both the CidepeLab interface and the data-processing, scrolling, 5-input multi-chronometer.
