

Rotation dynamics device, bluetooth multi-timer.

EQ282BT

Function

Intended for the study of two-dimensional motion, periodic motion, centripetal force, uniform circular motion, centripetal acceleration, period, frequency, relationship between centripetal force, mass, path radius and frequency in an MCU, angular velocity, tangential velocity, relation between centripetal force and angular velocity, angular momentum, conservation of angular momentum, conical pendulum, conical pendulum movement and equilibrium, frequency and critical period of the conical pendulum.

Knowledge areas

Physics - Various Sets

Level

Graduation - Technical education - High school
