

Distillation set with electronic circulating hydraulic flow controller, sensor and interface

EQ332B

Function

Intended for experimental study, chemistry laboratory and carrying out chemistry experiments on: Separation of mixtures. Fractional distillation. Vaporization. The distillation. Simple distillation. Fractional distillation. How to prepare the ethanol-water mixture. Data analysis through a graph. Installation of the distillation system. Preparation of data acquisition system, etc.

Knowledge areas

Chemistry

Level

Graduation - Technical education - High school
